

**BIG BOYD
OPTION 2**

ROCKLABS BIG BOYD OPTION 2

Big inputs and accurate outputs for seriously reliable results.

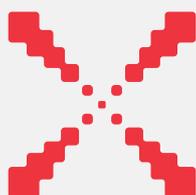

Featuring top and bottom moving jaws, the Big Boyd is designed for maximum crushing in a single pass.

Available in 2 options, with the second option handling heavy samples and coming with a dumpmaster lifter.

The Big Boyd crusher accepts samples up to 150mm, reducing to 10mm or less in a single pass with the jaws able to hold up to a 20kg sample. The Big Boyd has quick jaw adjustment with horizontal steel rollers and is ideal for inclusion into an automated system.

Benefits:

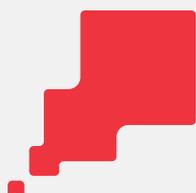

- Increased Input Size
- Low Maintenance
- Simple Servicing
- Health & Safety Improvements
- Increased Warranty

Motor Power	11kW, 3 phase
Maximum Input Lump Size	150mm
Jaw Width	400mm
Product Size	-10mm (+80%)
Options	Rotating Sample Divider

	Product	Crate 1	Crate 2	Crate 3
Height	3071mm	1350mm	1455mm	1390mm
Width	2093mm	1190mm	1785mm	3280mm
Depth	1425mm	1700mm	1680mm	1280mm

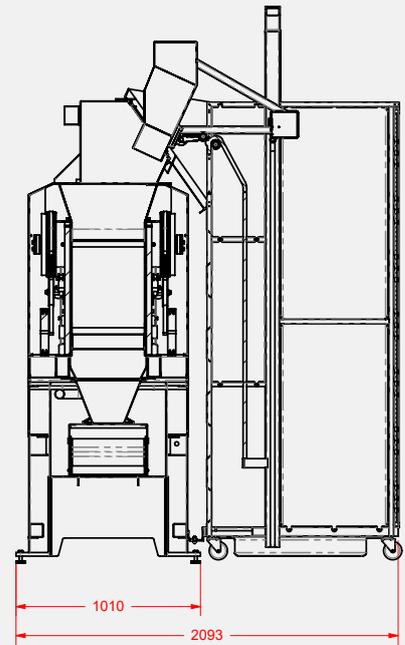

Powered by Scott for worldwide support.

Rocklabs Big Boyd Primary Crusher is sold with a 2000 operating hours or one year warranty (whichever comes first), covering all parts (excluding wear parts) and labour if used under normal laboratory conditions.
